About Us

AVENTIA is the new strong player in the global solar energy market, offering PV solutions for residential, commercial and large-scale installations.

It is a member of a leading group of companies with over 25 years of successful market presence. AVENTIA was founded by a team of professionals with a deep understanding and extended knowledge of the international solar industry as well an extensive track record in entrepreneurship. Its offices are located in Amsterdam, Netherlands and Athens, Greece.

AVENTIA manufactures quality Mono and Polycrystalline solar modules in Europe, conforming to the quality standards of TUV, MCS, CE, IEC. Additionally, our collaboration with leading logistics and transportation companies ensures in-time deliveries.

With the support of our 3PL partners in the Netherlands, Hungary and Greece, we are able to guarantee delivery of our products in no more than seven days, anywhere in Europe.

Our values

AVENTIA's commitment is to deliver sustainable value to its clients, partners, employees and all its stakeholders. By operating our businesses at benchmark levels and by building and sustaining long-lasting professional relationships based on trust and respect, we will expand our global brand and our business infrastructure all over the world.

Our sole aim is to maximize our customers' profits through quality, reliability and mutual understanding.

NETHERLANDS

Customer Service

With offices and warehouses in the Netherlands, Hungary and Greece, we get closer and closer to our customers and their needs.

AVENTIA guarantee their international profitable solar power solutions and customized service. Our relationships with solar professionals do not come to an end with product purchases; In fact we take for granted that each purchase is part of a lasting, mutually prolific partnership with our customers. That's why AVENTIA invests in a committed system of customer support, which affects everything from the flexibility of payment terms to in-time product delivery.

We offer an exclusive set of benefits under the AVENTIA International Partnership Program, as:

- Competitive per-watt pricing
- Flexible payment terms
- No minimum order quantities
- Exceptional customer support

Production

AVENTIA solar modules are produced in the European Union under the strictest quality standards, in state-of-art manufacturing facilities and undergo several major inspection procedures including

- 3 times EL testing to ensure end product without micro cracks, opposed to 1 or 2 times by other manufacturers.
- 3 times appearance inspection to ensure no defects, opposed to 1 or 2 times by other manufacturers.
- 1 time power testing and inspection to ensure expected power output is being delivered from each and every solar panel.

This way we are able to guarantee reliable products, perfect appearance and positive power performance.

Product range

Argos 190 - 310 Wp

Certus 190 - 315Wp

Certus Max 270 - 285Wp

Certus Silver 190 - 315Wp

Argos 190 - 310 Wp

The robust all-rounder.

Polycrystalline

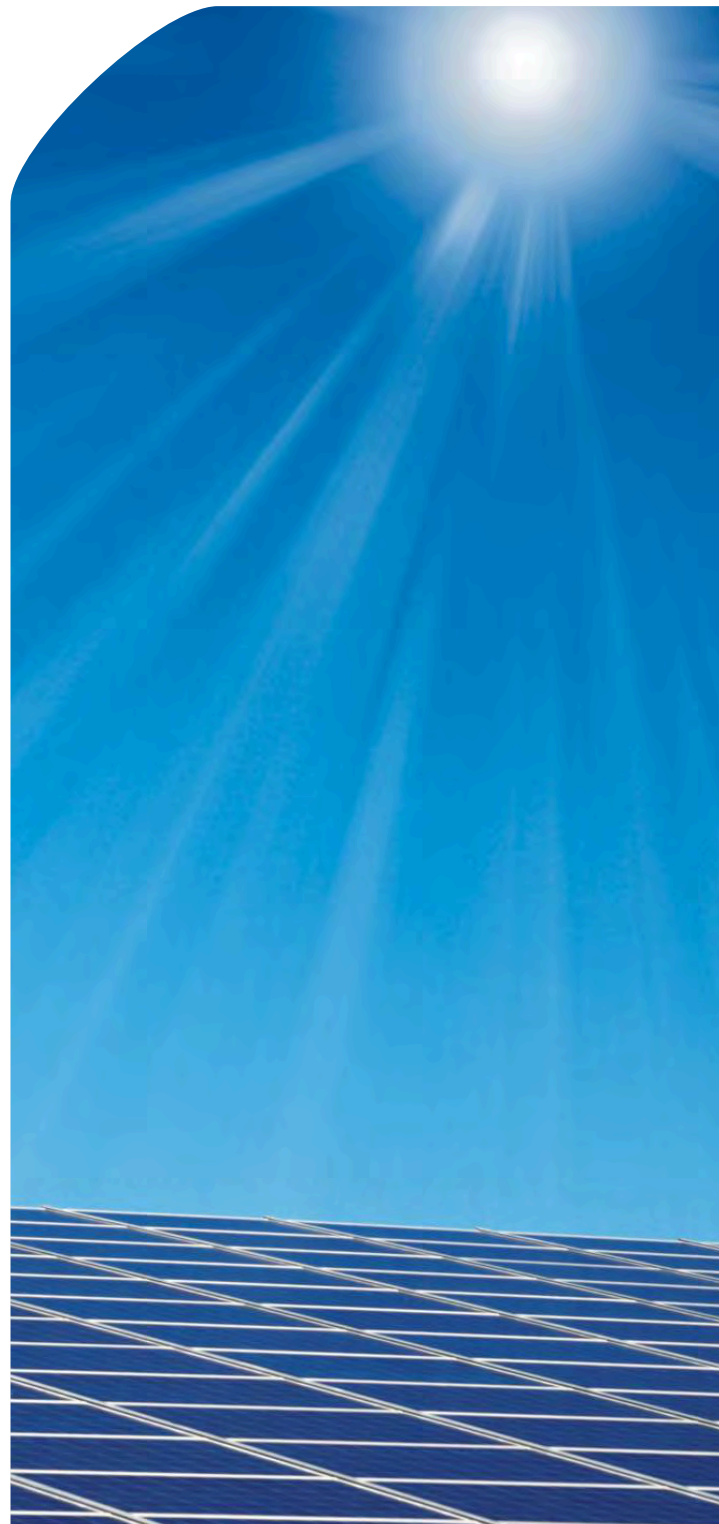

- Output: 190 - 310 Wp

The top quality PID free certified polycrystalline solar module from Aventia. It comes with extremely sturdy torsion and corrosion resistant aluminum frame AR coated front glass in combination with excellent performance & positive power tolerance.

It has a wide power range as it can be manufactured in 36, 54, 60 and 72 cell configurations from 100 to 315Wp.

The Argos is the perfect choice for every small medium or large solar project in which every detail counts.

Backed up by the solid Aventia 15 year product quality warranty and linear performance warranty of 25 years at 80% , this outstanding European made solar module is available from the Aventia warehouses in Rotterdam, Budapest and Athens.

Product range

Certus 190 - 315Wp

Black and beautiful.

Monocrystalline

- Output: 190 - 315 Wp

The Certus is the monocrystalline solar module that enjoyed an overwhelming success in the Dutch and Belgian markets in 2015 due to its aesthetic features but also its wide power range as it is available from 190 up to 315Wp in 54, 60 & 72 cells.

The Certus is the perfect solar module for residential installations in which the perfect balance between performance cost and aesthetics is a must.

Backed up by the solid Aventia 15 year product quality warranty and linear performance warranty of 25 years at 80%, this outstanding European made solar module is available from the Aventia warehouses in Rotterdam Budapest and Athens.

Certus Max 270 - 285Wp

Powerfully elegant.

Monocrystalline

- Output: 270 - 285 Wp

The new high performance AventiaCertus Max with a leading efficiency of up to 17.52% & positive power tolerance is the ideal choice for every residential project focusing on aesthetics and performance.

Backed up by the solid Aventia 15 year product quality warranty and linear performance warranty of 25 years at 80%, this outstanding European made solar module is available from the Aventia warehouses in Rotterdam, Budapest and Athens in 270 to 285Wp in 60 cell configuration.

The Certus Max is also available with white back sheet and silver frame.

SOUTH AFRICA

Certus Silver 190 - 315Wp

Reliably simple.

Monocrystalline

- Output: 190 - 315 Wp

The Certus Silver is a robust solar module that likes to keep everything simple. As all Aventia mono & poly solar modules the Certus Silver comes with grade A cells AR coated front glass and torsion and corrosion resistant aluminum frame combined with excellent performance & positive power tolerance. This module is ideal for residential and commercial projects with focus on performance and cost.

Backed up by the solid Aventia 15 year product quality warranty and linear performance warranty of 25 years at 80%, this outstanding European made solar module is available from the Aventia warehouses in Rotterdam, Budapest and Athens in 190 to 315Wp in 60 & 72 cell configurations.

Why AVENTIA

Based on sound and broad financial foundations and as a part of a group with more than 25 years of successful market presence, our vision and approach is encapsulated in the following statement:

We aim to contribute create a greener world and be recognized as a reliable and solid business partner in the world solar market.

Our distinguished advantage guarantees:

1. Quality Products: we will ensure the highest quality on monocrystalline and polycrystalline photovoltaic panels, through continuous quality controls and a fully automated production line.

2. Competitive Prices: we are determined in preserving our products' prices in highly competitive standards.

3. Exceptional Partner & After-Sales Service: we believe in partners not customers and we will be supporting them in every step of our cooperation. From our first interaction, to the product installation and the after-sales support, we will be offering outstanding service.

Our International Partnership Program is designed to cultivate and maintain long lasting mutually beneficial collaborations based on 3 major pillars.

Financial Incentives

We provide specific / detailed financial incentives to every partner of AVENTIA.

Trust through commitment and accountability

Irrespective of the size of the cooperation or the partner we guarantee the provision of high quality services and support throughout every interaction, in order to cultivate and establish high levels of trust towards our company.

Marketing & Communications

Offering an entirely unique marketing concept we actively support, on marketing & communications level, our partners helping them to differentiate on the local market.

Please, fell free to contact us in order to obtain more information on the AVENTIA International Partnership Program.
